

Limited Submission Funding Opportunities – updated 4/15/22

Please be aware that any grant that brings in less than 15% in indirect costs (IDC) will need to be supplemented up to the 15% equivalent by existing investigator or departmental sundry funds. Resolution of this issue must occur prior to submitting a proposal. Training fellowships from foundations, public charity, and non-profit organizations are excluded from this minimum IDC requirement.

For MGH investigators selected through a competitive process as the institutional nominee for any limited submission funding opportunities, in situations in which the grant will bring in less than 15% indirect cost (IDC), ECOR will cover the IDC gap up to a maximum of \$50,000 per year. In order to optimize the distribution of limited ECOR funds across the MGH research community, it is expected that PIs and departments will work together to cover the remaining IDC shortfall.

This policy is only effective for those limited submission opportunities in which MGH is invited to submit its own nominee(s). This policy does not apply for those limited submission opportunities in which the MGH investigator must apply through HMS.

For further questions, please contact ECOR at ecor@mgh.harvard.edu

We ask that all MGH Investigators interested in applying for any limited submission award submit a Letter of Intent (see detailed instructions below) to the MGH Executive Committee on Research (ECOR) by the deadline indicated for each award to be considered to receive an institutional nomination.

Process

Submit a one- to two-page Letter of Intent (LOI) to the MGH Executive Committee on Research (ECOR) via email to ecor@mgh.harvard.edu. In addition to your LOI, please include an NIH Biosketch.

The letter of intent should include:

1. Name of the Principal Investigator with appropriate contact information
2. A descriptive title of the potential application
3. Brief description of the project
4. Brief description of why you specifically should be selected to receive institutional nomination for this award

In the event that there is more than one MGH investigator interested in applying for a limited submission award, the LOIs will be used to assess candidates and a review and selection process will take place.

If there is a limited submission funding opportunity you do not see listed below or you have any additional questions, please let us know at ecor@mgh.harvard.edu.

CURRENT OPPORTUNITIES

1. Genome Research Experiences to Attract Talented Undergraduates into Genomic Fields to Enhance Diversity (R25 Clinical Trial Not Allowed)

<https://grants.nih.gov/grants/guide/rfa-files/RFA-HG-22-004.html>

MGH LOI Deadline: 4/19/22

NIH LOI Deadline: 6/01/22

NIH Application Deadline: 7/01/22

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research.

Limited Submission Funding Opportunities – updated 4/15/22

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this NHGRI R25 program is to support educational activities that encourage undergraduates from diverse backgrounds, including those from groups underrepresented in the biomedical workforce, to pursue further training and careers in the scientific, medical, ethical, social and/or legal areas of genomics research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on:

- *Research Experiences*
- *Courses for Skills Development*

This Genome Research Experiences to Attract Talented Undergraduates into the Genomic Field to Promote Diversity (GREAT) Program will support collaborative institutional partnerships that provide research education programs for undergraduates enrolled at minority-serving institutions (MSIs) or Institutional Development Award (IDeA)-eligible institutions. A partnership will include a MSI or IDeA-eligible institution, and one or more research-intensive institutions or organizations with a suitable research base for graduate-level training in scientific areas of interest to NHGRI.

2. Emergency Award: Rapid Acceleration of Diagnostics Tribal Data Repository (RADx TDR) (U24 Clinical Trial Not Allowed) – NEW!

<https://grants.nih.gov/grants/guide/rfa-files/RFA-OD-22-011.html>

MGH LOI Deadline: 4/20/22

NIH LOI Deadline: 5/01/22

NIH Application Deadline: 5/31/22

The National Institutes of Health (NIH) Office of the Director intends to support a Rapid Acceleration of Diagnostics (RADx[®]) Tribal Data Repository (RADx TDR) in response to the declared public health emergency issued by the Secretary, HHS, for 2019 Novel Coronavirus (COVID-19). This emergency cooperative agreement FOA provides an expedited funding mechanism as part of the [Rapid Acceleration of Diagnostics \(RADx[®]\)](#) initiative to accelerate innovation in the development, commercialization, and implementation of technologies for COVID-19 testing. This FOA seeks to fund a single RADx Tribal Data Repository (RADx TDR). The RADx TDR is intended to be an independent research data repository governed under the principles and practices of tribal sovereignty. The RADx TDR will provide responsible data sharing and access to researchers and their collaborators who are generating or interested in working with RADx American Indian and Alaska Native (AI/AN) research data.

3. NIDCR Dental Specialty and PhD Program (K12 Clinical Trial Not Allowed)

<https://grants.nih.gov/grants/guide/rfa-files/RFA-DE-23-001.html>

MGH LOI Deadline: 4/27/22

NIH LOI Deadline: 6/07/22

NIH Application Deadline: 7/07/22

The purpose of the NIDCR Dental Specialty and PhD Program (DSPP) is to develop outstanding dentist scientists through structured programs that provide advanced clinical training in an approved dental specialty, research career development activities, and mentored research training leading to a PhD in biomedical or behavioral science. The programs are expected to accelerate the process of early career dentist scientists achieving competencies in both clinical and research areas, and to facilitate their transition to independent and productive research careers dedicated to improving dental, oral, and craniofacial health.

Limited Submission Funding Opportunities – updated 4/15/22

4. Immune Drivers of Autoimmune Disease (IDAD) (U01 Clinical Trial Not Allowed)

<https://grants.nih.gov/grants/guide/rfa-files/RFA-AI-22-012.html>

MGH LOI Deadline: 5/02/22

NIH LOI Deadline: 6/01/22

NIH Application Deadline: 7/01/22

This Funding Opportunity Announcement (FOA) invites applications to participate in the Immune Drivers of Autoimmune Disease (IDAD) cooperative research program, which will focus on defining the immunologic states and dynamics that drive autoimmune disease. The main objective of this program is to enhance our understanding of the immunologic processes, events, and changes that underlie the clinical manifestations of autoimmune diseases, including disease flare, remission, and progression of established disease, as well as the progression from a state of elevated risk to clinical diagnosis of autoimmune disease.

5. NIH Faculty Institutional Recruitment for Sustainable Transformation (FIRST) Program: FIRST Cohort (U54 Clinical Trial Optional)

<https://grants.nih.gov/grants/guide/rfa-files/RFA-RM-22-008.html>

MGH LOI Deadline: 5/03/22

NIH LOI Deadline: 6/13/22

NIH Application Deadline: 7/12/22

The purpose of the FIRST Cohort is to transform culture at NIH-funded extramural institutions by building a self-reinforcing community of scientists committed to diversity and inclusive excellence (defined below). Implementing and sustaining cultures of inclusive excellence within the program has the potential to be transformational for biomedical research at the recipient institutions and beyond. This community will be built through recruitment of individuals who:

- are competitive for an advertised research tenure-track or equivalent faculty position (positions must be at the Assistant Professor (or equivalent) level),
- meet the criteria for NIH-defined [Early Stage Investigators](#), and
- have demonstrated a strong commitment to promoting diversity and inclusive excellence.
