

FOUNDATION FUNDING OPPORTUNITIES: JULY 1, 2022

Please contact Corporate & Foundation Relations in the Office of Development at devcfr@mgh.harvard.edu if you wish to submit a proposal in response to any of these opportunities. Note that proposals are still routed through the standard InfoEd/Research Management process.

Please be aware that any grant that brings in less than **20% in indirect costs (IDC)** will need to be supplemented up to the 20% equivalent by existing investigator or departmental sundry funds. Resolution of this issue must occur prior to submitting a proposal. Training fellowships from foundations, public charity, and non-profit organizations are excluded from this minimum IDC requirement.

The MGB **Proposal Deadline Policy** establishes internal deadlines for sponsored research proposals to ensure that submissions meet sponsor criteria and institutional/regulatory requirements. Deadlines are:

- The complete Administrative Components are due to Research Management (RM) on or before the **8th Business Day** by 5 PM.
- The Final (Science) Components are due to RM on or before the **3rd Business Day**.

1. Career Development Award (CDA), American Academy of Neurology (AAN)

The American Academy of Neurology is pleased to announce a three-year award to support junior investigators interested in an academic career in neurology. This award is for junior investigators interested in an academic career in clinical, basic, or translational neurological research.

Recipients of individual K or R awards are not eligible to apply for the Career Development Award (CDA). Applicants are allowed to apply for the AAN CDA and other federally funded career development awards (including NIH K awards and VA CDAs) or other career development awards supported by foundations of a similar scope simultaneously. To be eligible to apply for this award, the applicant's other grant source(s) cannot exceed \$150,000 annually.

Eligibility requirements (partial list):

- This award is for early career investigators interested in an academic career in clinical, basic, or translational neurological research.
- Recipient must be a neurologist and an AAN member interested in an academic career in neurologic research who completed residency between 5-10 years prior to the start date of the Career Development Award (July 1, 2023).
- If you have completed both residency and a PhD, your eligibility is based on when you completed residency. If you completed a fellowship of any kind after residency, your eligibility is still based on the date you finished residency.

Citizenship: Unrestricted

Award Amount: \$450,000 paid over 3 years

Indirect Costs: None

Research Management Deadline: August 23, 2022

Application Deadline: September 1, 2022

Website: <https://www.aan.com/education-and-research/research/aan-research-program/>

2. Clinical Research Training Scholarship (CRTS), American Academy of Neurology (AAN)

This award aims to recognize the importance of good clinical research and to encourage young investigators in clinical studies. For the purpose of this scholarship, research is defined as "patient-oriented research conducted with human subjects, or translational research specifically designed to develop treatments or enhance diagnosis of neurologic disease. These areas of research include epidemiologic or behavioral studies, clinical trials, studies of disease mechanisms, the development of new technologies, and health services and outcomes research." Disease-related studies not directly involving humans or human tissue are also encouraged if the primary goal is the development of therapies, diagnostic tests, or other tools to prevent or mitigate neurological diseases. Awards include:

- Clinical Research Training Scholarship
- Clinical Research Training Scholarship in ALS
- Clinical Research Training Scholarship in ALS and Related Disorders
- Clinical Research Training Scholarship in FTD
- Clinical Research Training Scholarship in Mal de Debarquement Syndrome and Central Vestibular Neurological Disorders
- Clinical Research Training Scholarship in Migraine
- Clinical Research Training Scholarship in Neurodisparities
- Clinical Research Training Scholarship in Neuromuscular Disease
- Clinical Research Training Scholarship in Parkinson's Disease
- Clinical Research Training Scholarship in Peripheral Neuropathy
- Lawrence M. Brass, MD Clinical Research Training Scholarship in Stroke
- McKnight Clinical Translational Research Scholarship in Cognitive Aging and Age-Related Memory Loss
- Susan S. Spencer, MD, Clinical Research Training Scholarship in Epilepsy

Eligibility requirements (partial list):

- Recipient must be an AAN member interested in an academic career in neurological research who has completed residency or a PhD no more than 5 years prior to the beginning of this award (July 1, 2023).
- If you have completed both residency and a PhD, your eligibility is based on when you completed residency. If you completed a fellowship of any kind after residency, your eligibility is still based on the date you finished residency.

Citizenship: Unrestricted

Award Amount: \$150,000 paid over 2 years

Indirect Costs: None

Research Management Deadline: August 23, 2022

Application Deadline: September 1, 2022

Website: <https://www.aan.com/education-and-research/research/aan-research-program/>

3. Richard Olney Clinician Scientist Development Award in ALS, American Academy of Neurology (AAN)

This award recognizes the importance of good clinical research and encourages young investigators in clinical studies in ALS. For the purpose of this scholarship, research is defined as “patient oriented research conducted with human participants, or translational research specifically designed to develop treatments or enhance diagnosis of neurologic disease. These areas of research include epidemiologic or behavioral studies, clinical trials, studies of disease mechanisms, the development of new technologies, and health services and outcomes research.” Disease-related studies not directly involving humans or human tissue are also encouraged if the primary goal is the development of therapies, diagnostic tests, or other tools to prevent or mitigate neurological diseases.

Eligibility requirements (partial list):

- Recipient must be an AAN member interested in an academic career in neurological research who has completed residency or a PhD no more than 7 years prior to the beginning of this award (July 1, 2023).
- If you have completed both residency and a PhD, your eligibility is based on when you completed residency. If you completed a fellowship of any kind after residency, your eligibility is still based on the date you finished residency

Citizenship: Unrestricted

Award Amount: \$240,000 paid over 3 years

Indirect Costs: None

Research Management Deadline: August 23, 2022

Application Deadline: September 1, 2022

Website: <https://www.aan.com/education-and-research/research/aan-research-program/>

4. Neuroscience Research Training Scholarship (NRTS), American Academy of Neurology (AAN)

The award aims to recognize the importance of, and encourage young investigators in, good laboratory or preclinical research. This award is for junior investigators interested in an academic career in laboratory-based research in neurology.

Eligibility requirements (partial list):

- Recipient must be an AAN member interested in an academic career in neurological research who has completed residency or a PhD no more than 5 years prior to the beginning of this award (July 1, 2023).
- If you have completed both residency and a PhD, your eligibility is based on when you completed residency. If you completed a fellowship of any kind after residency, your eligibility is still based on the date you finished residency.

Citizenship: Unrestricted

Award Amount: \$150,000 paid over 2 years

Indirect Costs: None

Research Management Deadline: August 23, 2022

Application Deadline: September 1, 2022

Website: <https://www.aan.com/education-and-research/research/aan-research-program/>

5. Practice Research Training Scholarship, American Academy of Neurology (AAN)

The American Academy of Neurology is pleased to offer an award to support practice-based research, which is defined as "clinical research that evaluates translation of evidence into best clinical practice." This may include evaluation of health services, quality of care, implementation of therapies, physician performance, or patient adherence. It is intended to create unique training opportunities previously difficult to access for neurologists. This award aims to recognize the importance of good practice-based research or comparative effectiveness research (CER) and encourage young investigators to use studies to improve health systems and services.

Research must be directed to care in the clinical neurosciences and must meet the definition of clinical practice research. For example, clinical trials of therapies would not meet the definition of clinical practice research, but trials of methods to improve physician adherence to guidelines would.

Eligibility requirements (partial list):

- Recipient must be an AAN member interested in an academic career in neurological research who has completed residency or a PhD no more than 5 years prior to the beginning of this award (July 1, 2023).
- If you have completed both residency and a PhD, your eligibility is based on when you completed residency. If you completed a fellowship of any kind after residency, your eligibility is still based on the date you finished residency.
- Must identify a mentor who is a proven clinical practice researcher. This person does not have to be a neurologist, and the proposed research may be distinct from that of the mentor.

Citizenship: Unrestricted

Award Amount: \$150,000 paid over 2 years

Indirect Costs: None

Research Management Deadline: August 23, 2022

Application Deadline: September 1, 2022

Website: <https://www.aan.com/education-and-research/research/aan-research-program/>

6. AACR-Lung Cancer Initiative at Johnson & Johnson Stimulating Therapeutic Advances through Research Training (START) Grants, American Association for Cancer Research (AACR) **NEW!**

Dramatic advances made in recent years towards precision medicine initiatives, biomarker and novel target identification, and high-throughput examination of genomic data, have resulted in a trove of valuable data that can inform the development of new therapeutics to combat cancer. However, to effectively harness this wealth of information and advance the discovery and development of new therapies for cancer patients, enhanced collaboration between academia and industry will be needed.

The AACR-Lung Cancer Initiative at Johnson & Johnson Stimulating Therapeutic Advances through Research Training (START) Grants represent an exciting initiative to address the need for promoting and supporting such collaborations. These grants, which will provide support to postdoctoral or clinical research fellows from underrepresented groups, combine research experiences in both academic and industry settings, following a research timeline that will be of greatest benefit to the proposed work. The training provided through this grants program will be invaluable to young investigators by providing fellows with a comprehensive research experience that will make them highly desirable to potential employers in either academic research or the pharmaceutical industry.

Eligibility requirements (partial list):

- Applicants must belong to one of the following underrepresented groups as per NIH guidelines:
 - Individuals from racial and ethnic groups that have been shown by the National Science Foundation to be underrepresented in health-related sciences on a national basis
 - Individuals with disabilities, who are defined as those with a physical impairment that substantially limits one or more major life activities
 - Individuals from disadvantaged backgrounds.
- At the start of the grant term, applicants must:
 - Hold a full-time, mentored research position with the title of postdoctoral fellow, clinical research fellow, or the equivalent
 - Have begun their most recent postdoctoral fellowship within the past three years.
- Applicants must be AACR members.

Citizenship: Unrestricted

Award Amount: \$225,000 paid over 3 years

Indirect Costs: None

MGB Research Management Deadline: August 9, 2022

Application Deadline: August 18, 2022

Website: <https://www.aacr.org/grants/aacr-lung-cancer-initiative-at-johnson-johnson-stimulating-therapeutic-advances-through-research-training-start-grant/>

7. Underrepresented Minority Fellowship in Gene and Cell Therapy for Oncology, American Society of Gene and Cell Therapy

Racial and ethnic minorities are underrepresented in the scientific workforce, specifically in the number of postdoctoral fellows transitioning into faculty positions. ASGCT is committed to addressing these disparities and providing opportunities for professional development in biomedical research for underrepresented groups.

Eligibility requirements (partial list):

- Self-identify as Black, Indigenous, and/or Latinx.
- Be a member of ASGCT.
- Be a postdoctoral or early-stage investigator.

Citizenship: United States

Award Amount: \$100,000

Indirect Costs: None

MGB Research Management Deadline: July 21, 2022

Application Deadline: August 1, 2022

Website: <https://asgct.org/awards/diversity-and-inclusion/underrepresented-minority-fellowship-oncology>

8. Underrepresented Population Fellowship Award in Gene and Cell Therapy for Any Indication, American Society of Gene and Cell Therapy

Various groups are underrepresented in the scientific workforce, including racial and ethnic minority groups, people with disabilities, and those from disadvantaged backgrounds.

ASGCT is committed to addressing these disparities by providing opportunities for professional development in biomedical research for underrepresented groups.

Eligibility requirements (partial list):

- Be from a group underrepresented in the scientific workforce, as defined by the NIH
- Be a member of ASGCT.
- Be a postdoctoral or early-stage investigator.

Citizenship: United States

Award Amount: \$100,000

Indirect Costs: None

MGB Research Management Deadline: July 21, 2022

Application Deadline: August 1, 2022

Website: <https://asgct.org/awards/diversity-and-inclusion/underrepresented-population-fellowship-any-indicat>

9. Research Grant Program, Amyloidosis Foundation

The Amyloidosis Foundation is committed to serving patient needs by supporting research and providing annual grants for junior research scientists whose research targets the challenges in the field of amyloidosis.

For over a decade, the Amyloidosis Foundation grant program has supported outstanding research in all forms of systemic amyloidosis. Through our research program we encourage, promote and invest in the medical study and exploration of the amyloidosis diseases.

Eligibility requirements (partial list):

- Applicants who are within 10 years of completion of post-doctoral studies or clinical fellowship are eligible to apply for funding.
- Applicants must have a mentor, who guarantees an environment that will support the research project of the applicant.

Citizenship: Unrestricted

Award Amount: \$50,000 for 1 year

Indirect Costs: 15%

MGB Research Management Deadline: September 1, 2022

Application Deadline: September 13, 2022

Website: <http://www.amyloidosis.org/research/#grant-programs>

10. Advancing Imaging Through Collaborative Projects, Chan Zuckerberg Initiative **NEW!**

Imaging ecosystems are highly fragmented, which slows the spread and adoption of imaging hardware and software technologies, methods, and data. While the quickly growing worldwide imaging community is beginning to collaborate to develop new technologies and resources that can benefit the broader ecosystem, many of these projects are supported by dedicated volunteers and operated without dedicated funding. To broaden the impact of these efforts, the Chan Zuckerberg Initiative (CZI) invites applications for new and existing collaborative projects to reduce imaging ecosystem fragmentation and accelerate the spread and adoption of technologies, methods, or training resources.

Funds can be requested in one or more of the categories below:

- Validation and dissemination of new imaging technologies: Collaboration between technology developers and imaging scientists to test and validate new imaging systems and/or to adopt new imaging platforms at imaging cores.
- Building capacity: Developing frameworks (e.g. websites or coordinating organizations) that enable collaborations in the imaging community and online platforms to exchange methods, tools, and protocols.

- Training and education: Organizing in-person or online courses on imaging for biomedical researchers and train-the-trainers programs, implementing and adapting new media for training and education, and developing teaching materials or courses for researchers who are starting their careers as imaging scientists.

Citizenship: Unrestricted

Award Amount: Unspecified

Indirect Costs: 15%

MGB Research Management Deadline: August 29, 2022

Application Deadline: September 8, 2022

Website: <https://chanzuckerberg.com/rfa/collaborative-projects-imaging/>

11. Dynamic Imaging, Chan Zuckerberg Initiative NEW!

The Chan Zuckerberg Initiative (CZI) invites applications in the field of dynamic imaging that will support the development of new tools or significant enhancements of existing tools to monitor biological processes in motion, across time, and across spatial scales. This grant program will provide 2.5-year challenge grants for projects with specified proof-of-concept milestones.

The long-term goal of this RFA, part of CZI's Frontiers of Imaging effort, is to drive technology development aimed at measuring cellular and molecular processes in real time in intact, living systems. Priority will be given to proposals for methods developed for imaging in intact tissues or primary cells rather than immortalized cell lines. This opportunity is specifically aimed at technology development; it is not intended to support question-driven basic or translational research, clinical trials, or drug development. Preliminary data is encouraged but not required.

Examples of research themes include:

- Development, detection and/or tracking of multiple labels (e.g. multi-spectral Raman microscopy, hyperspectral imaging, tracking of multiple single particles labeled with different probes);
- Development of new dynamic reporters (e.g. reporters for protease activity, kinase activity, cellular ion concentration fluctuations, protein-protein interaction, organelle specific chemical labeling, mechanical or electrical forces);
- Development of correlative methods for temporal studies (e.g. correlative light and electron microscopy with a dynamic imaging component);
- Adaptation of static methods for dynamic imaging (e.g. improvements of liquid cell electron microscopy), and;
- Hardware, software, algorithm or biological probe development to obtain high-resolution dynamic measurements in deep tissue or in large volumes (e.g. 4D/5D imaging at cellular resolution in whole organs, 4D/5D cell microscopy at super-resolution).

Citizenship: Unrestricted

Award Amount: Unspecified

Indirect Costs: 15%

MGB Research Management Deadline: August 12, 2022

Application Deadline: August 23, 2022

Website: <https://chanzuckerberg.com/rfa/dynamic-imaging/>

12. Single-Cell Biology Data Insights, Chan Zuckerberg Initiative

The Chan Zuckerberg Initiative (CZI) seeks applications for projects that aim to use and gain insights into health and disease from existing single-cell datasets to help accelerate progress toward challenges associated with the compilation and exploration of large atlas-scale data. Given the growth of single-cell biology and the rapid increase in available data, CZI is looking to support projects that will advance the fields of single-cell biology and data science.

Grantees will be expected to interact with a network among participating groups that builds community and accelerates progress. Applications are encouraged from computational experts outside the field of single-cell biology but with expertise relevant to overcoming current bottlenecks. Projects may include dedicated efforts to refine existing computational tools, benchmark classes of tools, improve standards, integrate available data that enables greater biological insight, develop new features that support interoperability of data or tools, and other major challenges brought forward.

Citizenship: Unrestricted

Award Amount:

- Expanded Project: \$400,000 for 18 months
- Focused Project: \$200,000 for 18 months

Indirect Costs: 15%

Research Management Deadline: August 16, 2022

Application Deadline: August 25, 2022

Website: <https://chanzuckerberg.com/rfa/single-cell-data-insights/>

13. International Networks of Excellence Program (INEP), Leducq Foundation

Leducq Foundation is an international grant-making organization comprised of the Leducq Foundation for Cardiovascular Research in Houston (a US-based 501(c)(3)) and the Leducq Corporation, in Boston, MA, which provides administrative services to the grant-making entities, dedicated to improving human health through international efforts to combat cardiovascular and neurovascular disease. In support of this mission the Leducq Foundation has created the International Networks of Excellence in Cardiovascular and Neurovascular Research Program, (formerly the Transatlantic Networks of Excellence in Cardiovascular and Neurovascular Research Program) which promotes internationally collaborative basic, translational, and clinical research in cardiovascular and neurovascular disease. The principal aim of this program is to foster outstanding and innovative scientific research by bringing together international teams of researchers with complementary expertise and resources to

work together on a common thematic problem. The proposals should aim to generate new knowledge with the potential to advance the diagnosis, prevention, and treatment of cardiovascular and/or neurovascular disease.

The size of the network may vary depending on the theme, on the type of research, and may not be determined fully at the outset. More important than the size of the network is the rationale for the inclusion of the members, and the case that is made for the collaborative benefit to be gained by their inclusion. As a general recommendation, the total number of institutions should not be greater than six, at which point the network becomes more difficult to manage.

Applications are accepted from teams of at least three researchers.

Citizenship: Unrestricted

Award Amount: \$8 million paid over 5 years

Indirect Costs: 15%

LOI Deadline: September 13, 2022

Research Management Deadline: February 2, 2023

(Invited) Application Deadline: February 14, 2023

Website: <https://www.fondationleducq.org/international-networks-of-excellence-how-to-apply/how-to-apply/application-instructions/>

14. Early Career Investigator Award, National Ataxia Foundation (NAF)

The Early Career Investigator Award was created to encourage early career clinical and scientific investigators to pursue a career in the field of ataxia research. It is our hope that ataxia research will be invigorated by the work of talented individuals supported by this award.

Applications for any form of ataxia are accepted for this award.

Eligibility requirements (partial list):

- Candidates must have obtained an MD or PhD degree, and have an appointment as a junior faculty member, senior post-doc, or clinical fellow.

Citizenship: Unrestricted

Award Amount: \$50,000 for 1 year

Indirect Costs: None

LOI Deadline: September 28, 2022

MGB Research Management Deadline: September 27, 2022

(Invited) Application Deadline: October 6, 2022

Website: <https://ataxia.org/researcher-resources/>

15. Pioneer SCA3/MJD Translational Research Awards, National Ataxia Foundation (NAF)

The Pioneer SCA Translational Research Award is for a research project that will facilitate the development of treatments for Spinocerebellar Ataxia Type 3/Machado Joseph Disease.

Citizenship: Unrestricted

Award Amount: \$100,000 for 1 year

Indirect Costs: None

LOI Deadline: September 29, 2022

MGB Research Management: October 10, 2022

(Invited) Application Deadline: October 19, 2022

Website: <https://ataxia.org/researcher-resources/>

16. Post-Doctoral Fellowship Award, National Ataxia Foundation (NAF)

Post-doctoral fellowship awards are to serve as a bridge from post-doctoral positions to junior faculty positions. Applicants should have completed at least one year of post-doctoral training, but not more than two at the time of application and should have shown a commitment to research in the field of ataxia. The award will permit individuals to spend an additional third year in a post-doctoral position and increase chances to establish an independent ataxia research program.

Eligibility requirements (partial list):

- Completed at least 1 year post-doctoral training but not more than 2 years at time of application
- Award will permit individuals to spend an additional third year in a post-doctoral position and increase chances to establish an independent Ataxia research program
- Underrepresented minorities strongly encouraged to apply.

Citizenship: Unrestricted

Award Amount: \$35,000 for 1 year

Indirect Costs: None

LOI Deadline: October 5, 2022

MGB Research Management Deadline: October 24, 2022

(Invited) Application Deadline: November 2, 2022

Website: <https://www.ataxia.org/researcher-resources/>

17. Seed Money Research Grant, National Ataxia Foundation (NAF)

NAF research grants are for new and innovative studies that are relevant to the cause, pathogenesis or treatment of the hereditary or sporadic ataxias. Research grants are offered primarily as “seed monies” to assist investigators in the early or pilot phase of their studies and as additional support for ongoing investigations on demonstration of need. It is hoped that these studies will be further developed to attract future funding from other sources.

Citizenship: Unrestricted

Award Amount: \$50,000 for 1 year

Indirect Costs: None

LOI Deadline: September 29, 2022

MGB Research Management: October 10, 2022

(Invited) Application Deadline: October 19, 2022

Website: <https://ataxia.org/researcher-resources/>

18. Clinical Research Pilot Grant Program for Myasthenia Gravis, Rare Diseases Clinical Research Network (RDCRN) **NEW!**

MGNet, a NIH-funded Rare Diseases Clinical Research Consortium (RDCRC) in partnership with the Myasthenia Gravis Foundation of America and Conquer MG, is seeking proposals for highly innovative investigations in early stages of development. The priorities of the Pilot Grant Program are:

- Identification treatment responsive biomarkers (please see Focus On Biomarkers Research)
- Assess clinical measures and improve that enhance clinical trial readiness
- Evaluation of therapeutic interventions for one or more of the five distinct sub-types of MG (additional information in the full proposal will be required for clinical trials).
- Pilot studies must be designed to access the resources of MGNet and focused on clinical research, including fulfilling the definition of clinical research and exclusion of animal studies.

Citizenship: Unrestricted

Award Amount: \$150,000 paid over 2 years

Indirect Costs: 10% included

MGB Research Management Deadline: September 22, 2022

Application Deadline: October 1, 2022

Website: <https://rdcrn.org/mgnet/pilot>

19. Myasthenia Gravis Network (MGNet) Scholar Program, Rare Diseases Clinical Research Network (RDCRN) **NEW!**

There is a critical need for investigators prepared to conduct clinical and translational research in myasthenia gravis (MG). Priority areas for the MGNet Scholar Program include:

- Clinical Research
- Biomarker Development
- Research Neuroimmunology

Eligibility requirements (partial list):

- Applicants must have a MD (or equivalent) or PhD.
- Clinical fellows, post-doctoral fellows, or junior faculty are eligible.

- Applicants must identify a primary mentor with appropriate content expertise and experience mentoring young investigators.
- MGNet Scholars do not have to be at a MGNet site.

Citizenship: Unrestricted

Award Amount: \$156,000 paid over 2 years

Indirect Costs: None

MGB Research Management Deadline: September 22, 2022

Application Deadline: October 1, 2022

Website: <https://rdcrn.org/mgnet/scholar>

20. Grant Projects, SAGES Education & Research Foundation/Society of American Gastrointestinal Endoscopic Surgeons (SAGES)

The SAGES Education & Research Foundation awards grants that help to advance its vision of a healthcare world in which all operative procedures are accomplished with the least possible physical trauma, discomfort, and loss of productive time for the patient.

The overarching goal of the Foundation is to advance laparoscopic, endoscopic, and other minimal access surgical methods by supporting reproducible scientific research and outcome studies, graduate and postgraduate education, and public information.

Citizenship: Unspecified

Award Amount: Up to \$100,000 for 1 year

Indirect Costs: 15%

MGB Research Management Deadline: August 26, 2022

Application Deadline: September 7, 2022

Website: <https://www.sagesfoundation.org/guidelines/>

21. Sulzberger Institute Grants, Sulzberger Institute for Dermatologic Education/American Academy of Dermatology (AAD)

The Sulzberger Institute for Dermatologic Education, part of the American Academy of Dermatology, provides grant support for innovative initiatives in education and technology. Grants typically provide seed funds to help dermatologists begin projects that will improve patient care.

Proposals that focus on technology-based teaching applications that are novel and cutting-edge, and also further clinical education in dermatology, are encouraged. The number of awards and grant amounts is contingent upon the quality of the applications received.

Citizenship: Unspecified

Award Amount:

- Seed Grants: \$30,000-\$60,000 paid over 1-2 years
- Small Grants: Up to \$5,000 for 1 year

Indirect Costs: Unspecified

LOI Deadline: August 19, 2022

MGB Research Management Deadline: November 2, 2022

Application Deadline: November 11, 2022

Website: <https://www.aad.org/member/career/awards/sulzberger-institute>
